**Old West Industries, Inc. – DBA Moser Leather Co. // Wright-Bernet Brush Co. Division – 513-889-0500 or 800-874-1167 (order line).
Begins on 12/6/2019**

Wright-Bernet has ties to Hamilton, Ohio as far back as 1935. The company was originally on Bender Avenue in Hamilton, and then moved to Symmes Rd. when it outgrew the old location. In 2008 it was purchased by DQB Industries, Inc. and moved to Lavonia, Michigan. We purchased the Wright-Bernet Grooming Brush Division, and are also bringing back other models of brooms and brushes that we are being asked to make in this industry and others. Our brushes have been used on many animals including horses, cattle, goats, dogs, and swine. You pick the brush that will work the best for your particular animal.

Our Classic Wood Blocks that we make our brushes out of cost more than plastic blocks; however they tend to hold the fiber much better and can be lasered with various designs or even your logo; whereas plastic cannot. ** NOTE ALL LASERED BRUSHES ARE \$1.25 MORE EACH. OUR LOGO OR YOURS EITHER SIZE BLOCK. After 2 years of owning Wright-Bernet we have finally had to purchase new Fiber after using up what we purchased from DQB. Fiber has went up substantially. As a result we have had to raise some of our prices; however we have been able to lower some of our production costs on the smaller blocks as reflected in the new price list. The natural fibers come from all over the world depending upon where they grow. Horse Hair comes from China, and Mexico and are subject to some tariffs or crossing fees. Plastic Fibers are made here in the USA. All mfg. is done here in the USA, mainly at our Hamilton, Ohio plant. When you turn over one of our brushes and look at the fibers, you will see more fiber than you will the actual wood block. That is because we pack our brushes pretty tightly so you can get your work done much faster than you can with an import brush that has much less fiber. We also still own Moser Leather Company. We contract tan our mostly American Hides in tanneries here in the states and Mexico. We finish the hides here in Hamilton, making Harness, Latigo, and dyed leathers. We offer strip and die cutting services and some finished goods as indicated.

*** See below for fiber information....

Other style fibers for Shop Floor Sweep are available as well. Fibers determine the performance for the use intended. Plastic resists oil. Firmness will determine the performance as well. Tampico helps with wet surfaces. Palmyra is good for moving dirt, just like Bassine and Firm Plastic. Softer bristles like horsehair and flagged plastic help move dust and fine particles.
